

Our Zero to Landfill Pledge

Since 2022, none of our end of life uniform
has gone to landfill.

Here's how we do it...

The Recycling Process

Life of Product

01 Collection

End of Life uniform is transported to our recycling partner

02 Shredding

The uniform is shredded to a partial size of 15mm ensuring the destruction of all logos & branding.

Our 100 years experience means we know what makes a garment last longer, reducing demand for virgin materials.

Contact us to find out what we do different.

03 Bailing

The fibres are bailed ready for reuse

05 Reuse

The recycled fibres are repurposed and reused in many household products

04 Certification

Once the uniform has been destroyed, we receive a certificate of destruction.
